

SOUTH COAST CACTUS AND SUCCULENT SOCIETY
REGULAR MEETING, SEPTEMBER 8, 1974; 1:30 P. M.
South Coast Botanic Gardens
26701 Rolling Hills Road
Palos Verdes Peninsula

Stan Oleson, President

PROGRAM: Members are asked to bring a plant and tell us all about it -- from where he begged, borrowed or stole it to how it has been cared for. And bring pictures or slides of it in bloom if you have them. There will be a projector there.

PLANT OF THE MONTH: Cereopegia is Bob Causey's choice this time. This is a genus we have given little attention to, but has some of the most interesting flowers of any of the succulents as well as very pretty foliage on some of them (and practically no leaves on others!).

LAST MONTH: Mr. Loren Gillogly from the U. S. Department of Agriculture was the speaker. He gave an interesting talk on importing plants and control of plant disease and presented slides about an insect hunting trip. Also, he brought the members a booklet on "Traveler's Tips" and 5 glass covered cases with mounted insects which were identified.

NLW MEMBER:

Helen Grosse

San Pedro, Ca.

SOME corrections for the 1974 Club Roster have already been given me, and if there are any errors in how you are listed, please give them to me at the meeting or call me, 370-6033, so that I may put them in the Newsletter for October. *Elleanor Barber*
