NEXT MEETING

Sunday August 10, 2014, 1:30 PM

We will meet in the hall.

Presentation by: Brian Kemble

"Treasures of the Sierra Madre"

See below for details ...

REFRESHMENTS FOR AUGUST

Many thanks to those who helped in July.

Volunteers for August refreshments are:

Maria Blas Nancy Moser
Irene Brenner Betty Saunders
Lupe Hulett Danny Westall
Elly Lendenbaum

If you would like to bring something to our next meeting, please feel free to do so – thanks!

Kitchen Volunteers – Please see Carol Causey after the meeting if you would like to help with kitchen cleanup.

PRESIDENT'S MESSAGE

As many of you know, I have made an effort to reduce the time spent on "business" at our meetings - transferring almost all of it to your Board of Directors. For the most part I think this has worked fairly well. However, it has limited the amount of feedback the Board gets from non-board members. And

while it's probably true many members are content to come to hear the speakers, I don't think this is what is needed to build a strong sense among members that the club is something they value and in which they want to participate. At the July meeting I conducted a couple of straw polls.

I asked if you favored changing our CGCI status from Club to Associate. The vote was slightly in favor (19-13) of changing it to Associate. Becoming an Associate member would principally mean we could decide whether to remain in the Costa Verde District. Unfortunately the Board didn't have time to discuss this. Feel free to send a Board member or me your thoughts.

I also asked if you were in favor of scheduling small discussion groups (workshops) to learn more about succulents in a setting where questions could be asked and practical skills learned. Everyone present favored this, so Gary Duke is going to schedule such a session as a trial. There are many, many questions about this. Where to hold the sessions? Most favor a SCBG classroom, but at a member's home is a possibility. When? Most favor before a meeting, but in lieu of a regular meeting is a possibility - several groups at once. Will we have to charge for room rent, instructors or materials? Possibly the Society could absorb these costs. How often? Maybe quarterly but it depends on attendance and interest. Who will act as moderators? We hope Society members. How will the topics be selected? TBD. In fact everything is TBD. The list of questions seems endless. I think this is a long over due innovation and I'm keeping my fingers crossed that it will become a major part of our Society's activity. Again, feel free to contact a Board member or me to share your thoughts.

Thank you.

Dale La Forest, President

PRESENTER FOR AUGUST: Brian Kemble - "Treasures of the Sierra Madre"

Brian lives in San Francisco, and is Vice-President of the San Francisco Succulent and Cactus Society. He is the Curator at the Ruth Bancroft Garden in Walnut Creek, CA, where he has worked for the last 30 years. As well as other succulents he has grown and hybridized Aloes since the 1970's, and is the Vice-President of the Institute for Aloe Studies. Brian loves to see and photograph succulents in habitat, and has made has made many trips to Mexico (at least 20), South Africa, Namibia and Madagascar.

A trip through Mexico's Sierra Madre Oriental

Mexico's Sierra Madre Oriental runs from north to south, parallel to the Gulf Coast. Its rugged mountains are cleft by rivers which form deep canyons, creating lots of diverse habitats. This trip began to the north of Mexico City in the state of Hidalgo and went on into Queretaro, San Luis Potosi, a little bit of southern Tamaulipas and Nuevo Leon, and Guanajuato. This area is very rich in cacti, echeverias, pachyphytums, agaves, yuccas, dasylirions and hechtias, among other wonderful plants.

Echeveria secunda

Hechtia argentina, Astrophytum ornatum, Ferocactus glaucescens, and Ferocactus echidne

MINI-SHOW RULES

Exhibitors must be club members in good standing and must be present at the meeting in order to receive points. One name representing the same household must be used unless plants are grown separately. Minishow coordinator will be consulted if there is any question of entry identity.

Any container may be used, including plastic, as long as it is clean. All plants must be groomed and free of pests and disease.

There are two plant categories, "Cactus" and "Succulents". Up to three plants per individual may be entered in each category.

There are three entry classes: "Novice", "Intermediate" and "Open". Only members new to the hobby would be expected to be in the novice class. After the December meeting, members' point total will be reviewed by the Programs Committee Chair and Minishow Coordinator.

Novice members awarded more than 64 points or winning at least 6 first place awards will be asked to move to the Intermediate class in both categories. Intermediate members awarded more than 64 points or winning at least 6 first place awards, will be asked to begin showing in the Open class. Members will not be allowed to regress to a lower level.

All plants must be grown by the exhibitor for a minimum of six months for novice and intermediate and one year for open class. An individual plant may be entered only once a year.

Points score: First Place 6, Second place 4, Third

place 2.

Placement: Entries that are not disqualified receive

one point.

PLANTS OF THE MONTH (POM) 2014						
	Cactus	Succulent				
January	Mammillaria straight spines	Adenia, Cisus and Cyphostemma				
February	Rebutia	Sansevieria				
March	Gymnocalycium	Crassula				
April	PLANT SHOW AND SALE					
May	Stenocactus	Gasteria				
June	Crests / Monstrose	Echeveria				
July	Coryphantha	Mesembs				
AUGUST	FEROCACTUS	AGAVE / YUCCA				
September	Ariocarpus	Haworthia				
October	Cactus dish gardens	Succulent dish gardens				
November	Eriosyce	Winter Bulbs				
December	HOLIDAY PARTY					

CACTUS OF THE MONTH: AUGUST - Ferocactus

Ferocactus is a medium sized genus, with about 40 members and centered in Mexico, with a few species native to California and the Southwest, and a few to Guatemala.

With age, Ferocactus generally get to be very large plants, particularly when grown in the ground. Fortunately, they are fairly slow growers and when grown in pots, they will stay at a comfortable size for many years. Although there are only about 40 species, many of them are fairly variable, with widely varying spine lengths, shapes, textures and colors, depending on the specific locality.

Ferocactus fordii

Ferocactus latispinus

Ferocactus are easily grown, and most are perfectly happy outdoors without protection year round in Southern California. A normal well draining potting mix will do well. They need sun to bring out the colors and textures of the spines.

Ferocactus cylindraceus

Ferocactus pilosus

Ferocactus echidne

Ferocactus hamatacanthus

Ferocactus cylindraceus

Ferocactus are easily raised from seed. Planting is most successful when done in April or May. The seedlings grow slowly at first, but soon take off. There are several advantages to growing Ferocactus from seed. The first is that the selection of type localities and spine variations is far greater than you will ever see at a plant show or sale. The second and most important is that you get to grow the plant through it's awkward juvenile growth. During the second year Ferocactus spines grow completely out of proportion to the Ferocactus body. A Ferocactus that will eventually be a foot in diameter, and 4 feet tall with 3 or four inch spines, will have as a seedling a body less than an inch in diameter, with spines an inch or more long.

Tom Glavich

SUCCULENT OF THE MONTH: 1. Agave

Agaves, like the Cacti, are entirely new world in origin, although many members have been naturalized around the world.

Agaves are native to Southern North America, Mexico, Central America, Northern South America and the West Indies..

Agave filifera compacta

Agave potatorum cv. Kichijokan marginata

Agaves at Manhattan Beach

Agave titanota

Agave pumila

Agave toumeyana

Agave americana

Agaves are easily grown from seed. Although many of members of this genus grow very large with age, they are particularly good looking as seedlings, and can be kept small for many years in pots. They thrive with regular feeding with any general purpose fertilizer. Their appearance is best when they are cleaned regularly, with debris removed from the leaves, and dead leaves removed to prevent insects from making homes. Many offset freely, and these offsets can be removed and repotted, giving a steady supply of small plants. Many growers keep the offsets, and dispose of the the mother plant, keeping size, health and condition under control.

Tom Glavich May 2002

Agave victoriae reginae

SUCCULENT OF THE MONTH: 2. Yucca

Yucca is a genus of perennial shrubs and trees in the family Asparagaceae, subfamily Agavoideae. Its 40-50 species are notable for their rosettes of evergreen, tough, sword-shaped leaves and large terminal panicles of white or whitish flowers. They are native to the hot and dry parts of North America, Central America, South America, and the Caribbean.

The natural distribution range of the genus Yucca covers a vast area of North and Central America. From Baja California in the west, northwards into the southwestern United States, through the drier central states as far north as Alberta in Canada. Yucca is also native to the lowlands and dry beach scrub of the Gulf and South Atlantic states from coastal Texas to easternmost Virginia. To the south, the genus is represented throughout Mexico and extends into Guatemala. Yuccas have adapted to an equally vast range of climatic and ecological conditions. They are to be found in rocky deserts and badlands, in prairies and grassland, in mountainous regions, in light woodland, in coastal sands, and even in subtropical zones, although these are generally arid to semiarid.

Yucca flaccida

Yucca brevifolia

Yucca-aloifolia-marginata

Yuccas are widely grown as ornamental plants in gardens. Yuccas are widely grown as architectural plants providing a dramatic accent to landscape design. They tolerate a range of conditions, but are best grown in full sun in subtropical or mild temperate areas.

Joshua trees (Yucca brevifolia) are protected by law in some states. A permit is needed for wild collection. As a landscape plant, they can be killed by excessive water during their summer dormant phase, so are avoided by landscape contractors.

Yucca pallida

CALENDAR OF UPCOMING EVENTS FOR 2014

(07/01/2014)

AUG. 9-10 29th ANNUAL INTERCITY SHOW AND SALE AT THE LA COUNTY ARBORETUM,

9am-5pm daily. 301 NO. BALDWIN AVE., ARCADIA, CA.

INFO: CALL TOM GLAVICH 626-798-2430 or JOHN MATTHEWS 661-714-1052

AUG 30 The Huntington Botanical Gardens will be hosting it's 31st Succulent Plants Symposium in

the Ahmanson Room, Brody Botanical Center at the HBG on Saturday, August 30 from 8:30 a.m.–5 p.m. Ethiopian succulents will be highlighted in this one-day symposium. Featured speakers include Sebsebe Demissew and Nigist Asfaw, both from the College of Natural Sciences at Addis Ababa University. The \$75 fee includes lunch. Dinner is optional at \$25.

Registration: 626-405-3504 - SEE LEAFLET BELOW.

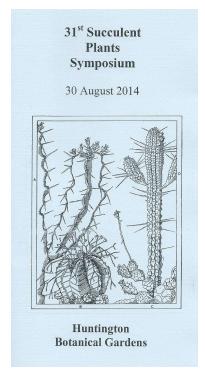

SEPT. 7 LONG BEACH CACTUS CLUB ANNUAL PLANT AUCTION -12-5PM

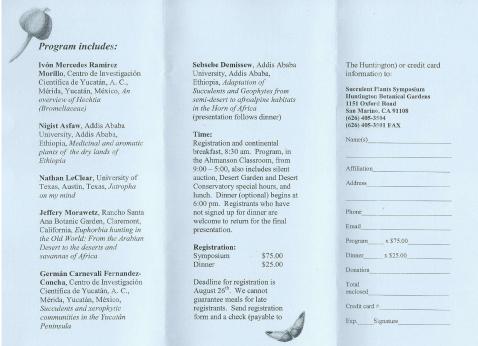

RANCHO LOS ALAMITOS, 6400 BIXBY HILL ROAD, LONG BEACH, CA 90615

INFO: 310-922-6090

NOV. 1 & 2 SAN GABRIEL CACTUS AND SUCCULENT SOCIETY 9am-4pm both days

SHOW AND SALE---LA COUNTY ARBORETUM ADDRESS ABOVE

NO PARKING NOTICE

Submitted by Dale La Forest

No Parking Behind Francis Young Hall

As applicable, thank you for moving your vehicles when I asked before the July meeting. Here is the letter I received a formal letter stating this policy.

The road behind the Frances Young Hall is a Fire Lane with Loading Zone Only. No vehicles are permitted to park in this area on either side of the road.

The Hall side of the road is indicated by red curb as well as signs stating the following:

NO PARKING - LOADING ONLY.

Loading is permitted for immediate unloading and loading of materials or people. Vehicles should have their flashers on and the vehicle's driver should be immediately available to move their vehicle in case emergency vehicles need access.

The far side (fence side) of the road is indicated by signs on the retaining wall stating the following:

NO STOPPING AT ANY TIME FIRE LANE.

Loading is NOT permitted here but on the other side of the road closest to the hall. This gives enough room to allow passage by work vehicles and other authorized drivers.

All drivers will be expected to follow these safety rules.

Thank you for your cooperation in this matter. Please contact the Foundation Office for questions on this policy

WATERWISE GARDEN CENTER

The new WaterWise Garden Center, owned by Ellyn Meikle Holloway, will be open for business August 1st at the location of the old Rolling Hills Nursery at 25633 Crenshaw Blvd @ Rolling Hills Way.

They are promoting water wise gardens and gifts with drought-smart plants, which include succulents, cacti, and orchids. They will be focusing on educating and encouraging the community to amend their landscapes to more drought-tolerant plants to save water.

For more information:

Tel: 310.326.6500

MEMBERSHIP NEWS

Submitted by Sally Fasteau

New Members:

Please welcome new members:

Elly Lindenbaum from Redondo Beach Susan Smeltzer from San Pedro.

Membership Renewal Information:

First I'd like to thank all of the members who renewed their membership for the coming year. For those who would still like to renew, please complete the attached Membership Form and return it with your check to our treasurer, Bernard Johnson.

The dues are now \$18.00 per person and the hard copy of the newsletter is now \$12.00. The newsletter is still free if delivered by email.

Membership Directory:

The 2014-2015 Membership Directory will be published at the end of September and sent to all current members. If anyone wishes to have member contact information before that time, please let me know and it will be sent to you. As a reminder, this is a confidential list shared with members only and is not to be used for commercial purposes or shared with those outside the club.

SCCSS Name Badges:

If you need a new name badge, please notify the membership chair before the next meeting and one will be waiting for you at the sign-in table.

Membership Chairperson sallyfasteau@cox.net 310-544-1313
