PLANT OF THE MONTH:

Echinocereus is the one this month. About now they are splitting their hides  
in anticipation. Well, anyway, the flower buds are pushing through the hides, and  
we are bursting with anticipation, waiting for the relatively large flowers and  
beautiful colors.

LAST MONTH:

Margaret Emery illustrated her subject, "Along the Cactus Trail", with great  
slides, punctuated at the end with some pictures of the Emerys' yard and some of her  
favorite flower pictures, including some prize winners in photography competition.
