

SOUTH COAST CACTUS AND SUCCULENT SOCIETY
REGULAR MEETING, AUGUST 11, 1974; 1:30 P. M.
South Coast Botanic Gardens
26701 Rolling Hills Road
Palos Verdes Peninsula

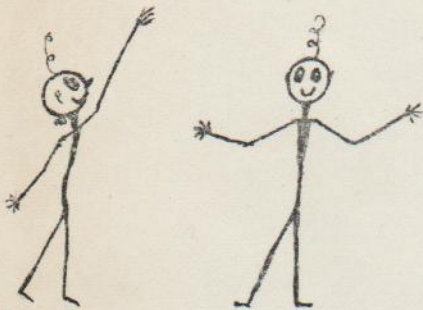

President, Stan Oleson

PROGRAM:

Mr. Gillōgly of the Agricultural Inspection Department will talk on importing Cacti. This will be of interest not only to those who dream of going to some place where they can collect plants, but to anyone who collects plants even at the local nursery: what did a good many of the species have to go through to get here? Besides survive the hardships of their native locality, that is!

PLANT OF THE MONTH:

Cissus, which come from tropical and South West Africa, is the genus Bob Causey will tell us something about. Because of their facinating forms, some of them are candidates for the endangered species list.

BRAGGING TABLE

GOT SOMETHING TO BRAG ABOUT?

DON'T JUST TELL US ABOUT IT -- BRING IT

TO THE MEETING AND SHOW IT OFF, IF YOU CAN

CARRY IT!

LAST MONTH:

Bob Causey put us to the test with a plant naming contest. The winning score was 14 out of 30 by Eleanor Barker; second was Mary Belle Wallenhorst and Stu Bedwell did very on recognizing genera. The prize was a beautiful Echinocereus dealetii from Sandy Valley, Nevada. (Forgive us our ignorance, Bob -- we are a young club!)

Bob also gave a talk on Echinocereus and illustrated with a lot of slides. This is the first time we have seen that many Echinocereus all at once, and since their flowers are so showy, it was a real beauty pageant.

NEW MEMBER:

George Siegel
