## ZOOM PRESENTATION

Sunday, July 11 @ 1:30 pm

### Soil Mixtures and Watering Schedules

#### Speakers, Member Opportunities, August Show, & More

**Limited time showing:** If you missed Ernesto Sandoval's talk on "Succulents: Liberated or Constrained in Containers?", hurry, hurry. The presentation is available for a limited time on YouTube (link is on the Society's website home page <https://southcoastcss.org> and Facebook page) for those who still want to access the talk and the slide show of the plants of the month.

**Your photos in lights!** Show off your eye candy in July's Mini Show: Cacti of the month: Echinopsis and Lobivia. Succulent: Sansevieria. Please E-mail photos for the monthly Mini Show to me at [minniecap@icloud.com](mailto:minniecap@icloud.com) by July 9th so I may present them at the upcoming Zoom meeting. If you have a plant in the ground or want to share your garden, those photos are also welcome. Thank you to all who have shared photos of their gardens.

**"Hey, need some help?" Of course. Always.**

- Club Secretary. Minutes are important to our nonprofit standing. Want to help us keep them? Whether you have experience or not, call me to see what is involved and if you can help or know someone who can. We need to replace our present Secretary, Sue Wong. My number is: **310/346-6206**. Easy to follow format.
- Coordinator, Speaker Program. Can you help us coordinate identifying and introducing speakers for the monthly meeting? Many suggestions come from members who have heard a speaker at a convention or elsewhere, virtual or live. No limit on the formats and ideas we pursue with our speakers. Curious as to whether you could help or what is involved or know someone who might like to help? Call me. Gary and Jade would like to have someone else take over the job.

**NO AUGUST MEETING.** While on vacation, check out the Inter-City Show and Sale the same weekend. Variety, great displays, reasonable prices, and friendly people. Details below.

**Inter-City Show and Sale:** For those interested, new information on the Show and Sale: Dates are August 7-8, 2021. It will be held at the Los Angeles County Arboretum in Arcadia. The arboretum has made a rule that only 150 non arboretum members will be allowed to enter per hour. For this, reservations will need to be purchased in advance and can be made on the arboretum website. These reservation slots are live on the arboretum website 3 weeks in advance.

- Tickets reservation and price information can be [found here](#)
- Once you enter you can stay as long as you would like, you are not limited only to the hour your reserve.
- Entry for non-arboretum members starts at 11:00 AM. A reservation is NOT REQUIRED for arboretum members. Additionally, arboretum members are allowed earlier admission starting at 7:30 AM. If you are dying to get to the sale early or want a guaranteed time to attend, you might want to consider purchasing an arboretum membership ([Link to sign up](#)).

### SHARE YOUR GARDEN OR YOUR FAVORITE PLANT

Email me with photos of your garden and/or plants that we can publish as a way of staying connected.

## Soil Mixtures and Watering Schedules

BY MARIA CAPALDO, MIKE SHORT, LAUREL WOODLEY, AND GARY DUKE

**PRESENTERS FOR JULY: A Panel of SCCS Society Experts discussing their “Soil Mixtures and Watering Schedules”**

Maria Capaldo, Mike Short, Laurel Woodley and Gary Duke (in order of appearance) will discuss the soil mixtures they use and their watering schedules for both summer and winter growers. This is a rare chance to compare their points of view on our favorite plants. Do not miss it !

2021-2022

# Mini - Show Plant Calendar

## Mini-Show Plants for 2021-2022

July 2021	Lobivia, Echinopsis	Sansevieria
August 2021	Ferocactus, Leuchtenbergia	Stapeliads (Stapelia, Huernia, Orbea)
September 2021	Discocactus, Uebelmania	Kalanchoe
October 2021	Miniature (3 inches or less)	Miniature (3 inches or less)
November 2021	North American Columnar Cacti (Saguaro, Cereus, etc.)	Senecio
December 2021	HOLIDAY POTLUCK???	HOLIDAY POTLUCK???
January 2022	Mammillaria single headed	Lithops, Conophytum
February 2022	Stenocactus, Echinofossulocactus	Euphorbia from Madagascar
March 2022	Thelocactus	Aeonium, Greenovia
April 2022	SHOW and SALE	SHOW and SALE
May 2022	Cactus Dish Garden	Succulent Dish Garden
June 2022	Rebutia, Aylosteria, Sulcorebutia, Weingartia	Echeveria

JULY

## Monthly Cactus: Echinopsis

**Some of you may be surprised to learn that the Echinopsis genus has been revised** and now includes Lobivia, Tricocereus, Helianthocereus, Pseudolobivia, and many other lesser known and rare genera. At the Mini-show all these genera will be accepted under their old names, as will hybrids and cultivars.

The expanded genus now contains around 120 species, all of South American origin. The main reason for the consolidation is that although these species show variations in flower color, spination, and the body; in the wild there seems to be much natural hybridization and the former species and genera tended to merge at the boundaries of their range. These taxonomic changes have been criticized by K. Trout, in particular the inclusion of the genus Trichocereus, and the formation of a huge, complex new genus without an accompanying monograph. Some problems also arose due to namespace collision when this merger was made. Most notably, there had previously existed both *Echinopsis bridgesii* and *Trichocereus bridgesii*, which are very different plants.

### Cactus: Echinopsis

*Echinopsis bruchii*

*Echinopsis chamaecereus*

*Echinopsis cinnabarina*  
(=Lobivia)

*Echinopsis eyriesii* flower

*Echinopsis oxygona*

*Echinopsis oxygona*

By Tom Glavich

## Monthly Cactus: Echinopsis

*Echinopsis bridgesii* is a short clumping cactus, whereas *Trichocereus bridgesii* is a tall columnar cactus similar to E. (or T.) pachanoi. Under the new classification, *Trichocereus bridgesii* is known as *Echinopsis lageniformis*. It should be pointed out that many people, still use the old *Trichocereus* classification, especially in ethnobotanical writings. While taxonomists have merged these genera, it will take a long time for name changes to take effect among collectors.

Echinopsis have flowers that are scaly and woolly with a prominent ring of stamens in the throat. Lobivia generally have a short floral tube, flowers that open during the day, and have white or brightly colored flowers. Echinopsis tend to have a long floral tube, and the species usually have white or translucent flowers. There are exceptions to these generalities however, and many intermediate genera were created and abandoned in attempts to clarify the relationships. There are species that intergrade between Lobivia and Echinopsis and Trichocereus.

### Cactus: Echinopsis

*Echinopsis chiloensis*

*Echinopsis huascha* flower

*Echinopsis spachiana*

*Echinopsis ferox*

*Echinopsis cinnabarina*  
(=*Lobivia cinnabarina* var. *draxleriana*)

*Echinopsis pentlandii*  
(=*Lobivia*)

By Tom Glavich

## Monthly Succulent: Sansevieria

There are about 60 species of *Sansevieria*, but since many of the species are variable and have widespread habitats, there are more names than this. There are also dozens of cultivars, particularly of variegated *Sansevieria*. They are currently in the Dracenaceae family, but have moved through the ‘dumping ground’ families. In older references, they will be found in the Lilaceae, Aloiaceae, Agavaceae, and other families. Most *Sansevieria* are native to Africa, although some come from India, Asia and the South Sea Islands.

They are among the easiest of all succulent plants to grow, requiring only a pot or a spot in the ground. They are tolerant of incredible neglect and abuse, but most grow rapidly and well if watered and fertilized regularly. They do well in Southern California outdoors or in, and suffer damage only if they are cold and wet. They are free from most pests, suffering only rarely from scale. They are prone to fungal rusts, particularly in damp weather. The only cure for rust is to cut off the infected leaves, sterilizing the cutting tool after each cut (an alcohol wipe will do) and then spray the entire plant with a fungicide such as Funginex. Prevention is much easier. Bright light, and moving air prevent most rusts.

By Tom Glavich

### Succulent: *Sansevieria*

*Sansevieria cylindrica*

*Sansevieria ehrenbergii*

*Sansevieria* ‘Golden Banner’

*Sansevieria kirkii*  
var. *pulchra*

*Sansevieria eilensis*

*Sansevieria hallii*  
variegated

## Monthly Succulent: Sansevieria

**Sansevieria** propagation is remarkably easy. Cut a piece off, let it dry for a few days, and stick it in some potting soil. They propagate readily from leaves (tips are best), rhizomes, roots, etc..

Variation is very common in cultivated **Sansevieria**, and variegated plants form the majority of some collections. A variegated pup will appear on an otherwise normal plant. The variegation can be preserved by removing the pup and a portion of the rhizome, and growing it on. If this is not done, the variegated pup, being weaker than the rest of the plant will not reproduce. Variegated plants are slower growers than normal plants, and are much more sensitive to cold and wet conditions. They need protection, particularly in the winter. They are also sensitive to standing water in their crowns, quickly rotting it water is allowed to remain.

### Succulent: Sansevieria

*Sansevieria trifasciata*  
'Bantel's Sensation'

*Sansevieria trifasciata*  
flower

*Sansevieria trifasciata*  
'Golden Hahnii'

*Sansevieria trifasciata*  
'Hahnii' marginated

*Sansevieria trifasciata*  
'Futura'

*Sansevieria trifasciata*

By Tom Glavich

### CACTUS

**bruchii** [BROO-kee-eye] Named for Dr. Carlos Bruch, 20th century cactus collector in Argentina.

**chamaecereus** [kam-ay-KER-ee-us, kam-ay-SER-ee-us] From the Greek chamai (ground) and cereus (wax candle, torch).

**chiloensis** [kye-loh-EN-sis] Of or from Chile.

**cinnabarina** [sin-uh-bar-EE-nuh, kin-uh-bar-EE-nuh] Cinnabar-red.

**Echinopsis** [ek-in-OP-sis] From the Greek echinos (sea urchin or hedgehog) and opsis (like), referring to the plant's resemblance to sea urchins.

**eyriesii** [eye-REE-see-eye] Named for A. Eyries, 19th century cactus collector, who brought this species to Le Havre.

**ferox** [FER-oks] Fierce.

**huascha** [WAS-kuh] A local vernacular name in Argentina that means 'orphan'.

**Lobivia** [low-BIV-ee-uh] Anagram of Bolivia, where the plant is native.

**oxygona** [ok-SY-goh-nuh] Sharp-angled.

**spachiana** [spak-ee-AY-nuh] Named for Edouard Spach, 19th century Alsatian (French) botanist.

### SUCCULENT

**cylindrica** [sil-IN-dree-kuh] Cylinder-like.

**ehrenbergii** [er-en-BERG-ee-eye] Named for Christian Gottfried Ehrenberg, 19th century German naturalist.

**hallii** [HALL-ee-eye] 1. Named for Harvey Monroe Hall, 20th century American professor of botany and expert in taxonomy, or George Rogers Hall, 19th century American medical man.  
2. Named for Herman Christin van Hall, 19th century Dutch botanist, or Elihu Hall, 19th century American surveyor.

**kirkii** [KIR-kee-eye] Named for Kirk; the person commemorated depends on the specific epithet.

**pulchra** [PUL-kruh] Handsome, pretty.

**Sansevieria** [san-se-VEER-ee-uh] Named for Prince Raimond de Sansgrio de Sanseviero, 18th century patron of botanical expeditions.

**trifasciata** [try-fask-ee-AH-tuh] Three bundles.

*A day of fun, food, friends  
and PLANTS!  
At the Skillin Ranch  
in Arroyo Grande,  
San Luis Obispo Co.  
Saturday, July 24,  
9:00 am*

Ariocarpus Astrophytum Turbinicarpus Adenia Adenium Pterodiscus Zygosicyos Euphorbia Fockea Crassula Cissus  
Chenidopsis Conophytum Othonna Cyphostemma Haworthia Sesteria Aloe Kedrostis Ledebouria Sesuvium Sansevieria Bowia Raphanocarpus etc. etc.

Rob & Terry invite you to the Skillin ranch for  
**OPEN GREENHOUSE DAY**  
A day of fun, food, friends and PLANTS, on **July 24**  
Greenhouse opens for tours starting at 9:00  
Plant sales at 10:00  
Raffle at 12:30

- **Free Raffle Plants!**
- "Terry's Famous" **Complimentary Taco Bar** and **Free Refreshments!**
- **Silent Auction** of larger specimen plants (I need to make room for the new!)
- A wide variety of **Sales Plants** – everything from smaller to very large – all interesting, rare, well-grown and affordable!
- And of course – **Greenhouse & Botanical Garden Tours!**

*A great chance to meet up with friends, have an enjoyable day and go home with something new!*

We will have boxes available, but thanks if you can bring your own  
Cash and Checks only – sorry – no credit cards  
Contact: (805)709-3033 (no texts, please) rskillin@gmail.com

**Raffle Plants** – free ticket for everyone in attendance, no purchase necessary

- 1) Agave cv Japan – highly ornamental, suitable for pot culture
- 2) Rauhia peruviana – summer-grower w/ interesting flowers
- 3) Sansevieria cylindrica var. patula dwarf 'Boncel'
- 4) Adenium somalense – caudex attains huge proportions
